DETAILED ACTION***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 5, 8, 11 and 14 it is not clear what “substitution value” means. For the purpose of prosecution of the case it is interpreted to mean “degree of substitution”.

In claims 2, 6, 9, 12 and 15 it is unclear whether the final form of the starch is a flake or a powder.

In claims 3, 7, 10, 13 and 16 it is unclear whether the final form of the starch is a flake or a liquid.

In claim 4 it is not clear what “a crosslinking agent disposed to encourage crosslinking of the potato starch” means. If the applicant intends the starch to be crosslinked with a crosslinking agent, it should be clearly stated so with the identity of the agent. The claim as recited is not clear.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1623

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 8, 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Yanagawa et al (JP 354086629A).

Yanagawa et al disclose a product comprising a cation-modified starch (see abstract). Yanagawa et al also disclose that the degree of substitution is 0.425, which meets the limitation of at least a 0.01 substitution value recited in the instant claims (see page 182, left column, lines 2-3).

The terms "personal care", "adhesive", "agricultural drift control agent", "flocculent" and "coagulant" are not given patentable weight.
